

Good Morning,

As we prepare for the Spring 2027 launch of the new Student Information System, we want to provide a transparent overview of how this transition will directly impact your roles here on the Hill. To help you prepare for this shift, this update highlights our latest testing milestones, the new tools and automated workflows coming your way, and how we are managing upcoming system releases.

Project Milestone: Testing Underway

We reached a major milestone by starting comprehensive testing. This period of checks ensures our new system is accurate, secure, and fully ready for campus.

[Read More](#)

Hamilton's Workday Project Team gathered to kick off the full testing cycle.

What to Expect with the New System

Real-Time Data

Faculty and staff will gain real-time access to student academic progress.

- Registration and waitlist tracking
- Course rosters
- Placement exam data

Self-Service Capabilities

Many current processes will be routed directly through automated workflows.

- Concentration and minor changes
- Advisor assignments
- Permission to register requests

Goodbye Manual Workarounds

"Although I will still have to process Add/Drop forms manually once the semester starts, there are several forms that will be moving into Workday that should help everyone: **Credit/No Credit** requests, Requests to take 6 units, **Permission to Register** requests, etc."

- **Shannon Farrell**
Associate Registrar

Workday Updates On the Horizon

Workday pushes out global system updates twice a year and we are actively reviewing the upcoming September release.

We will provide an update with any key information so you are fully prepared for any interface changes.

WORKDAY STUDENT INFORMATION SYSTEM COUNTDOWN

PRIZE PACK

Good to Grow
Herb and Flower Garden Starter Sets

The banner features a blue background with a colorful striped border at the top. On the left, a large green stylized 'W' contains the text 'PRIZE PACK'. To the right, a white rounded rectangle displays the 'Good to Grow' logo and the text 'Herb and Flower Garden Starter Sets'. Below this, three boxes of garden starter kits are shown: 'Kitchen Herbs Grow Kit Easy & Fun', 'Colorful Violets Grow Kit Easy & Fun', and 'Complete Grow Kit'. Each box includes images of the plants and a list of contents.

While real-time data and automated workflows will make our daily routines easier, getting comfortable with a new system takes **time and practice**. Just like cultivating a thriving garden, a successful Workday transition requires planting the right seeds of knowledge today so we can reap the benefits tomorrow.

This month's prize is the "Good to Grow" garden starter kit, complete with all you need to bring some life to your workspace.

To enter this month's contest, it's time to **dig in** and practice using Workday's tools!

Enter this Contest

Student participation starts soon, so submit your entry today before competition heats up!

Look out for future newsletters and announcements in the coming months. We'll be sharing feature sneak peeks, interactive demos, and detailed updates to keep you fully prepared for our 2027 launch.
